

Shane James

SOFTWARE ENGINEER

SUMMARY

I enjoyed managing people, products, and businesses for five years. I relish in the opportunity to deliver reliable and transformative products to users! I'm looking for a position where I can learn and grow, in a fast-paced environment.

EXPERIENCE

- Full Stack Developer**
STALGIAC - REACT.JS & PYTHON 02/2021
 - Back-end is a RESTful API server built with Python and Django Rest Framework.
 - Designed and built resource model and end points. Built all CRUD related routes and utilized data serialization for performance.
 - Comprehensive performance testing completed with curl scripts.
 - Implemented SQL database to add resource relationship to a user.
 - Front-end built with React.js for user responsiveness, and component modularization.
 - Created session management with authenticated routes.
 - Stored user information such as email and hashed password securely in SQL database.
 - Integrated deployment to Heroku.
- Lead Full Stack Developer**
EXPECT: VIRTUAL TOURISM - REACT.JS & EXPRESS.JS 01/2021
 - Implemented Agile methods, Kanban, and scrum to lead a team of 3 other remote developers from user stories, to deployment.
 - Git/GitHub used for version control, feature branches, and pull requests to integrate team members' code into production code base.
 - Conducted code review through Zoom and Slack and performance testing with team members to improve automation.
 - Utilized MongoDB with Mongoose to create user and resource schemas. Also built customized routes and error handling.
 - AXIOS was integrated to make XML requests to our custom built API.
 - Integrated Stripe Checkout technology for authenticated users to make purchases.
- Full Stack Developer**
THE VILLAGE - JAVASCRIPT & EXPRESS.JS 12/2020-01/2021
 - Extensive design and planning executed through user stories, wire-framing, and ERDs to provide a dynamic and responsive user interface and user experience.
 - Utilized jQuery and DOM manipulation for seamless user interactions.
 - Front-end JavaScript designed to communicate with custom built API; read, write, and render data that it receives in the browser.
 - Implemented authentication so the writing and/or editing of data on a resource is only available to a signed in user.
 - Session management created with authenticated routes and JWT.
- Front End React.js Developer**
QUANTUP - REACT.JS 12/2020
WEATHER OR NOT - REACT.JS
 - Utilized Postman to test endpoints for third party APIs.
 - React class components and functional components with hooks used to write reusable and modularized code.
 - Extensive use of React lifecycle methods to provide a dynamic user interface.

EDUCATION

- Software Engineering Immersive Fellowship**
GENERAL ASSEMBLY 11/2020-02/2021
- BS Biology**
UNIVERSITY OF FLORIDA 08/2008-06/2012

SKILLS

-  Languages: JavaScript, HTML/CSS, Python
-  Technologies: React.js, Node.js, Django, MongoDB, Mongoose, Git/GitHub, Stripe
-  Other: API Design, User Interface Design, Relational Databases, Performance testing
